UZE-TECHEXPO 2023 PRESENTS ACHIEVEMENTS IN THE WORLD OF ELECTRONICS

UzE-TechExpo 2023 International Exhibition for Electronics, Electrical Engineering, Green Energy and Innovative Technologies will open its doors for industry professionals on **September 6-8, 2023** at the Uzexpocentre NEC.

The organisers are Congresses of Central Asia - CCA and its partner ICA Eurasia Group.

The electrical engineering industry is a driver of the national economy of Uzbekistan that demonstrates its accelerated development. Over the last 5 years, \$560 million has been invested in the industry, 163 new projects have been initiated. Currently, 205 projects worth \$1.2 billion are ongoing. As a result, the volume of production has increased 5 times, and exports - 3 times.

The industry is one of the key elements of research and technological progress, therefore its rapid development contributes to the development of many sectors of the economy.

In accordance with the Investment Programme of Uzbekistan for 2023-2025 approved by the Resolution of the President No. 459 on December 28, 2022, it is planned to invest in the next three years in the electrical industry \$604.9 million of investments, of which \$183.0 million is foreign direct investments. At the same time, in 2023, in the framework of 29 new investment projects and 7 modernisation and reconstruction projects, it is planned to allocate \$191.5 million of investments, of which \$58.0 million will be foreign direct investments.

The capacious and rapidly developing market of Uzbekistan provides great opportunities for investments and implementation of promising projects.

UzE-TechExpo is a unique platform for demonstrating new products in almost all sectors of the electrical and electronic industry: Technologies, equipment and materials, components and modules, measuring equipment, power supplies, wireless technologies, electrical products, cables; high technologies and "smart home" solutions from leading manufacturers and suppliers, the latest developments in modern products, as well as to hold meetings of professionals and establish business contacts.

Despite its young age, the exhibition receives great interest among professionals. This year the exhibition will be attended by companies from **PRC, Russia, Turkiye, Serbia and Uzbekistan**. They will present a wide range of electrics, electronics, household appliances, video surveillance systems, communications and telecommunications equipment, as well as solar panels.

Dahua Technology, the Gold Sponsor of the exhibition, is preparing a bright premiere of the latest developments in the field of intelligent video surveillance, data transmission and AIoT/IoT digital platforms.

Companies from PRC is among the **debutants of this year**. They will present products in the field of high technologies, including printed circuit boards, production and control and testing equipment, services in the field of the Internet of Things.

The domestic companies will be presented by the leading suppliers and manufacturers of household appliances, high-quality electrical goods (LED lamps, panels, shades, sockets, switches, extension cords, lamp holders, etc.), as well as renewable energy sources. They include Artel, Dusel Electrical, Solar Nature, Solar Grid, ThinkPower SRC.

In light of global trends and recent decisions taken by the Government of Uzbekistan on increasing a share of renewable energy sources in the national production, the **green energy section** of the exhibition attracts particular interest. This year, the number of participants in this section has significantly expanded. These are such companies

as: Asterion (Russia), Solar, ThinkPower SRC, Solar Nature (Uzbekistan). They supply solar panels, inverters, batteries for the needs of enterprises, organisations and the public, manufacture innovative solar inverters, renewable energy technologies, products for generating and storing solar energy.

A wide range of contracting services in the field of lighting, security and automation (Elekon Smart Building Technologies, Turkiye), an electronic library of analogues for Western ECs from Chinese manufacturers will be presented to the attention of visitors (PT Electronics / China Components, Russia), electrical equipment, fittings for low and medium voltage, as well as metering cabinets made of polyester (SMC) (Plamen, Serbia), communication systems, telecommunications equipment, video conferencing equipment (Rekovek, Russia).

UzE-TechExpo 2023 will allow not only to get familiar with the advantages of equipment and proposed solutions, but also to negotiate individual terms of cooperation with foreign and local companies on one site.

Official support is provided by the Chamber of Commerce and Industry of the Uzbekistan.
